1. Overview:

This group project requires students to design and develop a digital tool that promotes legal and ethical use of Digital Public Goods (DPGs). The tool should address real societal challenges, especially those aligned with the Sustainable Development Goals (SDGs) and local issues in Sierra Leone.

2. Project Objectives

- To design a functional digital solution addressing a real-world problem
- To apply legal and ethical frameworks in software development
- To use an approved open-source license (e.g., MIT License, Apache License 2.0)
- To ensure data accessibility, interoperability, and privacy compliance
- To develop skills in collaboration, documentation, and presentation

3. Suggested Project Ideas

- Groups may choose projects such as:
- Digital health awareness system
 - Educational content sharing platform
 - Agricultural information system

- Open data platform for governance transparency
- Disaster alert and response system

4. Key Project Components

➤ **Relevance to SDGs and Local Problems**

- Align your solution with SDGs (e.g., health, education, poverty reduction)
- Address a real issue in Sierra Leone (e.g., access to healthcare, education gaps)

➤ **Use of Approved Open Source License**

- Clearly state the chosen license
- Justify why it is suitable for your project
- Ensure compliance with license terms

➤ **Technical Implementation**

- System design (architecture, tools, technologies)
- Functional features of the tool
- Usability and performance

➤ **Documentation and GitHub Repository Quality**

- Well-structured README file
- Clear installation and usage instructions
- Proper version control using GitHub
- Clean, readable, and well-commented code

➤ **Data Accessibility and Interoperability**

- Ensure data can be accessed and reused
- Use open standards and formats (e.g., JSON, XML)
- Enable integration with other systems

➤ **Privacy and Legal Compliance**

- Protect user data (privacy policies)
- Ensure compliance with data protection laws
- Avoid misuse of sensitive information

➤ **Adherence to Standards and Best Practices**

- Follow software development best practices
- Use secure coding techniques
- Apply ethical guidelines in system design

➤ **Presentation and Demonstration**

- Clear explanation of the project
- Live demonstration of the system
- Ability to answer questions effectively

❖ Submission Guidelines

➤ Printed Documentation:

- Submit your assignment by printing the hard copy and also electronically, by showing all the screen shots and submit the soft copy to your class representative.
- Placed the system on flash drive and submit it during the presentation.
- The specified deadline for this final project is **week Eleven (11)**, any other assignment submitted after week eleven marks will be deducted.

Formatting:

- The assignment should be between 3,000 to 4,000 words.
- Use 12-point Tahoma font, double-spaced, with 1-inch margins.

5. Assessment Criteria

This assignment carries **100** marks and contributes **30%** to the total mark of this module. The following table breaks down the specific marking Criteria to be used for this particular assignment.

CRITERIA	MARKS
1. Relevance to SDGs & Sierra Leone Problem	/5
2. Open Source License Use	/5
3. Technical Implementation	/15
4. Documentation & GitHub Quality	/5
5. Data Accessibility & Interoperability	/10
6. Privacy & Legal Compliance	/5
7. Standards & Best Practices	/10
8. Innovation & Creativity	/10
9. Presentation & Report Quality	/10
10. Teamwork & Collaboration	/5
11. Presentation	/10
12. Exhibition	/10
Total	100

Note: Please adhere to the university's policies on academic integrity and plagiarism when completing this assignment.
